Meet your presenters

Bec Burtenshaw

Bec is a passionate educator that has always been driven by every child's right to learn and individual learning needs embraced. With a Masters of Education and experience as a Head of Curriculum, Bec has deep understanding on the importance of empowering teachers to develop their pedagogy. As a School Improvement Consultant, Bec works with schools across Australia supporting leaders and teachers on their journey towards personalised maths learning.

Tim Huppatz

Tim brings great understanding of what it takes to support students to succeed in maths. Passionate about the importance of developing student's growth mindset, independence and capacity to self-regulate, Tim was instrumental in the transformational work the Lakes College embarked on to harness parent engagement to support better learning outcomes. As an Acting Head of Maths at The Lakes College, Tim divides his time between the classroom and staff room supporting his colleagues continuous development too.

Success metrics: do the measures match our learning values?

A reflective session to explore success metrics and indicators that reflect important learning objectives that can be challenging to codify. Explore how you can define success in maths at your school, how to choose what to measure and find a way to quantify it so you can communicate effectively what really matters. Walk away with practical ideas to bring this to life in your school, get buy-in from leaders, students and parents and see the profound impact measuring success beyond traditional ways can have in how your school community feels about maths learning.

Audience

- Primary
- Junior Secondary
